7. Report on canteen fraud.

As announced at the EGA held on 26/06/2017, it was decided to hire 4 controllers (ALE monitors) to make daily checks at the canteen. The aim is to avoid that some secondary students may eat canteen meals without purchasing tickets or being registered to the canteen service.

Mr Piettre informs the Board that a status report on canteen fraud including the figures will be submitted to the Board at the next board meeting (24/04/2018).

8. Recruitment of canteen manager.

Mr Piettre informs the Board that the position of the canteen manager is still vacant. A vacancy post has been published on the following websites: ACTIRIS, APEEE Bruxelles IV, EURACTIV, HORECA Formation. The recruitment process is ongoing.

The list of selected candidates was presented and it was reminded to follow the rules applicable to the HR recruitment process (e.g. involve VP ADMIN).

9. Recruitment of interim administrative assistant for the canteen service (part-time position).

It is pointed out that the canteen office needs an administrative support for the coming months.

Vote: Who is in favor of recruiting an interim administrative assistant for the canteen service until 30th April 2018?

- Unanimity

The Board unanimously agrees to recruit an interim administrative assistant for the canteen service until 30th April 2018 to support also the timely follow up of the fraud cases.

10. DAO (State of play) for 3 services.

Mr Grigorescu-Negri submits to the Board another proposal in order to have an access control at the canteen quickly.

He proposes to use an IT solution, provided by TurboSelf company, specialized for each service (Transport/Canteen/Extra-curricular activities). There is a brief comparison between DAO and TurboSelf.

TurboSelf may provide two options: turnstiles or trays. This company proposes an annual license to be paid. DAO proposes a global price to be paid once. The Board responsible for the canteen is against TurboSelf's proposal. He points out that it would be more expensive if we consider the different operators for example: different maintenance contracts per solution/service, import of data per solution/ service etc.).

Mr Stricker refers that the school is waiting for the APEEE access system in order to activate the School access system. Mr Grigorescu Negri and Mr Stricker are working on specifications for the canteen. We should have specialized solutions for the canteen and later a discussion on transport and extra-curricular activities

It is pointed out that before taking a decision we have to know what the software does and what does not. Ms Petrova would like to have one application with different fields where we can track children and check if a child is in the right place.

11. Somerfesto (development of payment application by 26th May 2018 (State of play)).

The 10th annual Somerfesto will take place at EEBIV on 26th May 2018. Mr Julvecourt identifies three important key points to consider when organizing this event:

- Communication
- Collaboration with school
- Delivery

The planning for Somerfesto is progressing well. There will be a meeting with the school Director focused on collaboration with school and logistic aspects this Wednesday. In addition, there will be regularly meetings with Somerfesto responsables every week.

A communication regarding Somerfesto will be sent in the near future. The invitation for new parents 2018-2019 must be confirmed by the school.
